### **DETAILED ACTION**

Claims 1-12 were examined in the action. The restriction/requirement indicating group I being claims 2-12 was a typo and should have read claims 1-12, therefore claims 1-12 have been examined.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Clark(U.S. Pat, No. 6,052,230).

Regarding claim 1, Clark discloses at least one surface, said at least one surface comprising at least one optical structure having a shape and dimensions, wherein the shape and dimensions of each optical structure represents in part a modulation of a corresponding idealized stnzcture, and wherein said shape and dimensions of each of said at least one optical structure is determined in part by at least one randomly generated component of modulation wherein the modulation of each of said at least one optical structtlre is limited by a neighboring optical structure comprised by the surface. (col 2, and figures 5, 5A).

### ***Allowable Subject Matter***

Art Unit: 2873

Claims 2-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
